Portfolio: <https://www.vansh.fyi/>

Product Designer

Product Designer with **2.5+ years** of experience specializing in **designing** for **SaaS, Enterprise** and **mobile** applications. I actively research and utilize its data to inform product strategy, having led a recent project that simplified **complex user flows** and **decreased the average time on task by 50%**. As an expert in building scalable visual systems to ensure quality and coherence, I am eager to design and build technologies that give organizations the power to scale their products and make their users' lives easier. I am **open to relocation** and **immediately available** for hire.

Experience

DriQ Health

United States (Remote) | Feb 2024 - Sep 2025

Director of Product Design and Web Development

- Executed a data-driven growth strategy, aligned with the CEO's goal for broader product outreach, that grew daily unique visitors on their website: driqhealth.com **from 10 to over 700 (a 70x increase)**.
- Conducted **usability testing** on **Microsoft Clarity** for regular updates to the **website's UI Design** and **optimizing the user flow** for accumulating new business leads. This led to the company's first **B2B lead generation** channel, acquiring **1+ new business leads** per month.
- Collaborated with **AI** and **embedded systems engineers** to create detailed **UI design** and **CAD models** for their **updated series of digital devices**, delivering a high-fidelity prototype that improved the user experience and enabled a seamless handoff to development.
- Boosted average session time from **5s to 1m 10s** by redesigning the corporate website, **optimizing SEO** for search engines, and **enhancing GEO** visibility for large language models.
- Increased social media engagement and referral traffic by **10 times** by performing continuous **data, trends and keyword analysis** from **Google Analytics, Google Trends** and **Answer the Public** to optimize **social media posts** and **ad campaigns** for stronger engagement.

Freelance Web Designer

Oct 2024 – Feb 2025

- Initiated the company's digital transformation by **redesigning their corporate website** on **Framer**, focusing on improved **usability** and **brand coherence**.
- Developed and implemented the company's first **scalable design system**, ensuring **visual consistency** across all subsequent **products, devices** and **marketing assets**.

Partlink Solutions

India (Remote) | Apr 2025 - Jul 2025

Freelance Product & Brand Designer

- Led the design of the company's **mobile app** and **enterprise admin application**, creating a **comprehensive atomic design system** with **reusable components** and detailed documentation that accelerated the development of lifecycle.
- Made complex user flows intuitive for **first-time users**, resulting in a **50% decrease in average time on task** by conducting **iterative usability testing** and creating **interactive prototypes**.
- Established the complete **visual identity** for a new product (**Sparto**), designing the **logo, brand identity, and custom icon library and interactions** to create a cohesive and engaging user experience.
- Defined a user-centric product direction by conducting **on-site qualitative research** with local mechanics and automobile enthusiasts, resulting in **better navigation flows, better color choices** and **brand language** compared to competitors.

DIT University

Dehra Dun, India | Jul 2023 - Sep 2024

Assistant Professor 3

- Led a key departmental initiative by **redesigning the School of Design website** to **increase prospective student admissions** and **enhance the school's brand outreach**.
- Created **compelling narratives and presentations**, a skill honed by teaching UX design and research to over 350+ students.

App Mechanic

Chandigarh, India | Sep 2022 - Nov 2022

UI Designer

- Designed **foundational UI components** and **website** for the [Lalaverse](#): Web VR/VR metaverse platform, creating high-fidelity screens for the shopping experience, inventory management, and user customization.
- Shaped the core player experience for a mobile game by designing the end-to-end player controls, in-game menus, and leaderboards in collaboration with Unity and Unreal developers.

Synoriq

Jaipur, India | Aug 2021 - Sep 2021

Product Design Trainee

- Demonstrated significant **impact** and **ownership** by **leading the design** of two fintech applications and contributing to a third within a concentrated **1.5-month internship**, showcasing the ability to **deliver results in a fast-paced environment**.
- Designed the **enterprise application** for [Ovik Finance](#)(client communication and invoicing), [Synovein](#)(B2B loan authentication app) and contributed to [Synofin LMS](#)(B2B loan management platform) with my Product Manager.
